

MRIP Site Register Website

Frequently Asked Questions

1. How do I download all site data?

A. That option is not yet available, but we are working on it.

2. Why don't all sites show up on the big map?

A. The site needs to have a valid street address.

3. How do I request a user account?

A. User accounts are only necessary and provided to staff administering the For Hire Survey (FHS). Guests may request a login through the Feedback Form, available from the Contact Us option in the Help menu. Please include the state with which you are affiliated in the Description.

4. Are kayak anglers, with a guide in another kayak, considered charter anglers or private boat anglers?

A. Kayak anglers are considered charter anglers if the trip is guided. If there is no paid guide, then they are considered private boat anglers.

5. What does “no shore fishing present at site” mean in the flyover text for Shore Mode and Shore Area?

A. It means that only boats use this site; there is no shore access (natural or man-made) at this site.

6. What are the two export types?

A. The SITE export includes only basic information about the site, as shown on the Site tab. The PRESSURE export includes only the site usage information included under the Pressure tab. If you select BOTH, the system will download SITE and PRESSURE exports in separate files.

7. What does the Wave dropdown do?

A. The Wave dropdown box will limit the PRESSURE export to just the time slots associated with the month of the wave selected.
